

To Whom It May Concern,

I would like to express my opinion concerning the NAB's petition 04-160. I live in a metropolitan area that has high amounts of traffic. Listening to the Phoenix traffic and weather channel helps me with my daily commute to and from work and school. This channel is easy to listen to because it provides the clear information needed. Listening to other radio stations can take a lot of time before hearing a traffic report. XM radio provides a service that is not available elsewhere. I urge you to reject petition 04-160 for the benefit of commuters in the big cities that XM radio provides.

Respectfully,

Shannon Kling
